SWK™ Series

NEXT GENERATION CONNECTIVITY

SWK™ cabling infrastructure products are designed specifically to provide high density and low loss connectivity, ease of installation and manageability, low-cost deployment and operations, and flexibility for growth and scale.

- Install cabling infrastructure 5x times faster
- Reduce per infrastructure port cost by 65%
- Increase infrastructure footprint capacity by 40x
- Increase connectivity performance by 40%
- Reduce operational and asset management
- Eliminate Costly & Lengthy Procedures
  - Splicing
  - Testing
  - Cleaning
  - Validation

The **SWK™ Connector** brings never before seen innovations to the Consumer.

EXTREME FIBER COUNT CAPACITIES

- Available in 24 up to 192 fiber strand counts
- Flexible to your specific link requirements

SELF CLEANING & SELF PROTECTING

- Achieve <.35db loss at all capacities
- Eliminate connector/bulkhead cleaning and testing

QUICK POLARITY FLIPS (QFP) -
*Markers shown below*

- NO disassembly or manipulation
- Red to Red for straight through; Red to Blue for Flip

Connector end face in protected state

Connector end face in deployed state

More SWK™ Series Products

SWK™ Patch and Fiber Adapter Panels include innovations to help ease installation and operability, ensure performance integrity and lower your TCO.

RAPID LATCH

- No Tools - Just align the pins and turn the dial!
- Universal combability to all racks and cabinets

UNIVERSAL BULKHEAD MODULES (UBM)

- Save cost and rack space.
- Support all connector types

FLEX ADAPTER

- 40deg of additional bend radius!
- Better Cable Management

CURVED CHASSIS

- Easier installation access
- Lighter weight and better air-flow

IMPROVED ACCESS AND COUPLING
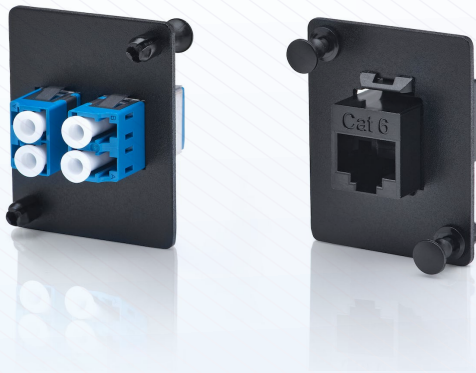

- Pull-out trays
- Flip-up ramped ports

SWK™ FAA Rapid Latch show in "unlocked" position

SWK™ FAP Flex Adapter with SWK Cable Assembly

SWK™ FAA Adapter Panels assortment

SWK™ FAP with ramped ports & integrated cable management
